Control the Properties of Objects

[GstarCAD 2027](#) · [Command Reference](#)

To organize objects in your drawing, you can change their properties, like layer, linetype, color, lineweight and plot style and control how they are displayed and plotted.

[Overview of Object Properties](#)

[Display and Change the Properties of Objects](#)

Display and change the current properties for any object in your drawing.

[Copy Properties Between Objects](#)

Copy some or all properties of one object to other objects using Match Properties.

[Work with Layers](#)

Organize and group your drawing's objects on layers, which are like transparent overlays.

[Work with Colors](#)

Assign colors to objects by layer or individually to help to group objects visually

[Work with Linetypes](#)

Use linetypes to distinguish objects from one another visually and make your drawing easier to read.

[Control Lineweights](#)

Control the thickness of object's lines in both the drawing display and plotting.

[Control the Display Properties of Objects](#)

Controls how overlapping objects and specified certain other objects are displayed and plotted.
