## Dimstyle Export

[GstarCAD 2027](#) · [Command Reference](#)

The DIMEX command is used to export named dimension styles and their settings to an external file.

Executing this command, starts the following dialog box :

**Export Filename**

Creates a DIM file. Enter the DIM file name or select Browse to locate the file. If the file does not exist, it is created. If the file does exist, a prompt requests permission to overwrite. The new file is an ASCII file.

**Available Dimension Styles**

Selects the dimension styles to write to the ASCII file. The current dimension styles are displayed. Each selected style is written to the file indicated in the Export Filename group.

**Text Style Options**

Saves either the dimension's Full Text Style Information or the Text Style Name Only to the ASCII file.

Note: Dimstyles are created and saved with the DDIM command. You must select at least one Dimstyle for the export to be successful.
