Extended Offset

[GstarCAD 2027](#) · [Command Reference](#)

The EXOFFSET command offers several advantages over the standard command, including layer control, undo, and a multiple option.

Specify offset distance or [Through] <T>: Specify the offset distance or through point

Select object(s) to offset or [Options/Undo]: Select an object to offset, change options or undo

Specify an option to set [Distance/Layer/Gaptype]: Specify an option

EXOFFSET Options:

Distance: Specify the offset distance or through point

Layer: Specify the layer for new objects. Current Layer or Source Object Layer

GapType: Sets or changes the offset mode as controlled by the OFFSETGAPTYPE variable. The options are: Normal, Fillet or Chamfer.
