Get Selection by Color

[GstarCAD 2027](#) · [Command Reference](#)

The GETCOLSEL command is used to quick select the objects with the same color.

Operation steps:

- 1.Start the command.
- 2.Select one object and system will take the object's color as target color.
- 3.Specify region.
- 4.System will select the objects which have the same color as the target object automatically.
