Get Selection by Layer/Color

[GstarCAD 2027](#) · [Command Reference](#)

The GETLAYCOLSEL command is used to select entities by color and layer.

Operation Steps:

- 1.Start the command.
- 2.Specify an entity which is in the target layer.
- 3.Specify region.
- 4.System will select the objects which have the same color and same layer as the target object automatically.
