

Get Selection by Object Type — GstarCAD 2027

5585 kbadmin September 26, 2026 [Command Reference](#) 0 7

Get Selection by Object Type

[GstarCAD 2027](#) · [Command Reference](#)

You can use the GETENTSEL function to multi-select objects with the same entity type in specified area.

Operation steps:

- 1.Start the command.
- 2.Select object and system will take the specified entity type as target type.
- 3.Specify region.
- 4.System will bring all the blocks with same entity type in region selected area into the selection.
