LINESMOOTHING System Variable

[GstarCAD 2027](#) · [Command Reference](#)

Function Description:

Without anti-aliasing, the inclined lines and curved lines appear jagged, like staircases. When anti-aliasing applied, the jagged effect is eliminated and the graphic are displayed more smoothly. You can also switch the anti-aliasing effect by setting the LINESMOOTHING system variable.

Type	Integer
Saved in	Drawing
Initial value	1
Range	0,1

System Variable Value:

- 0:** edges of lines, especially curved lines become less smooth and is jagged.
- 1:** edges of lines and curved lines are displayed more smoothly.
