Line to Pline

[GstarCAD 2027](#) · [Command Reference](#)

The Line2pl function can convert one or multiple connected straight line(s), arc(s) to one polyline.

After starting the command, a prompt message will be displayed> Please enter the join precision: 0

The Join precision will determine the union space between end points of each object. In this case, we will input value 0 to ensure the connection between objects (lines).

After inputting the join value,*Please select* the objects to be joined and converted to Polyline:

And finally, you have successfully created a polyline:
