PICKADD System Variable

[GstarCAD 2027](#) · [Command Reference](#)

Function Description:

The PICKADD system variable is used to control whether subsequent selections replace the current selection set or add to it.

Type	Integer
Saved in	User-settings
Initial value	2
Range	0,1,2

System Variable Value:

- 0:** close PICKADD. The new selected objects become selection set. The previous selected objects are removed from selection set automatically.
- 1:**
open PICKADD. Each object selected, either individually or by windowing, is added to the current selection set.
- 2:** open PICKADD. Add each selected object (single selected or window selected) to current selection set. If the SELECT command is used, keeps objects selected after the command ends.
- Note:** when selecting object, pressing SHIFT key to add objects to or remove objects from selection set.
