Replace Block

[GstarCAD 2027](#) · [Command Reference](#)

Function Description:

In the current drawing, you can use one block to replace another one, moreover, you can purge the unreferenced block definition when the operation is finished. Specify the block name to search for by selecting it in the list or by clicking the Pick button and selecting a block in the drawing.

Command Access:

Menu: Express > Blocks > Replace Block With Another Block

Ribbon: Express > Blocks > Replace Block

Toolbar: ET: Blocks Tools > Replace Block

Command: BLOCKREPLACE

Alias: /

Command Prompts:

/

Operation steps:

1. Start the command, the "Block Replace" dialog box is displayed as shown below. Specify the block name to search for by selecting it in the list or by clicking the "Pick" button and selecting a block in the current drawing.

2. Specify the replacement block.

3. After you select "OK" button in the above dialog box, the command line will prompt:

Purge unreferenced items when finished? [Yes/No] <Y>:
