

SIGWARN System Variable — GstarCAD 2027

SIGWARN System Variable

[GstarCAD 2027](#) · [Command Reference](#)

Function Description:

The SIGWARN system variable is used to control whether to send warning when opening a file attached with digital signature.

Type	Integer
Saved in	Registry
Initial value	1
Range	0,1

When this system variable is on, it displays digital signature status when opening a file with valid digital signature.

When this system variable is off, it only displays digital signature status when opening a file with invalid digital signature.

Users can use Open and Save tab in Option dialog box to set this system variable by Display digital signature information option.

System Variable Value:

- 0:** do not send warning when opening a file with valid digital signature
- 1:** send warning
