

SKYSTATUS System Variable — GstarCAD 2027

SKYSTATUS System Variable

[GstarCAD 2027](#) · [Command Reference](#)

Function Description:

The SKYSTATUS system variable is used to determine whether the sky illumination is computed when rendering.

Type	Integer
Saved in	Drawing
Initial value	0
Range	0,1,2

This system variable has no effect on viewport illumination or viewport background. It only makes sky available when collecting light source for rendering.

System Variable Value:

- 0:** turn off sky illumination
- 1:**sky background
- 2:** sky background and illumination
