## TILEMODE System Variable

[GstarCAD 2027](#) · [Command Reference](#)

### Function Description:

The TILEMODE system variable is used to control whether it is allowed to access paper space.

|               |         |
|---------------|---------|
| Type          | Integer |
| Saved in      | Drawing |
| Initial value | 1       |
| Range         | 0,1     |

### System Variable Value:

- 0:** allow to access paper space and set the recently accessed layout to be current
- 1:** forbid to access paper space and set the model space to be current
