Text Fit

[GstarCAD 2027](#) · [Command Reference](#)

The TEXTFIT command is used to stretch or shrink text object(s) by selecting new start and/or end points.

Command line prompts as follow:

Select Text to stretch/shrink:

Specify end point or [Start point]: Specify a new end point, or enter S to specify a new start point.

Note: The default uses the text's justification as the start point. If a new start point is specified, prompts are displayed to specify new points.
