Text Outline

[GstarCAD 2027](#) · [Command Reference](#)

The EXPLODETEXT function will split more thoroughly, after processing, texts are no longer words, but lines. When editing single line fonts, precision can be set to 1, set to higher numerical will make text warp, using truetype font from operating system, you can increase accuracy appropriately. The higher the accuracy, the shorter segments you will get, so you will get more segments.

Operation Steps:

- 1.Start the command.
- 2.Select objects to explode.
- 3.Press enter to finish. The text will break up into outline.
