To Clip an Xref

[GstarCAD 2027](#) · [Command Reference](#)

To Clip an Xref

1. Select an xref.
2. Click Modify > Clip > Xref on the main menu.
3. Select a polyline or specify a rectangular or polygonal clipping boundary. Specify the corners or vertices of the boundary.
4. Use the Invert Clip option to change the area to be hidden from outside to inside the clipping boundary.
The xref is clipped based on the area that you specified.
