To Create a Rectangular Mesh

[GstarCAD 2027](#) · [Command Reference](#)

To Create a Rectangular Mesh

1. You can enter the 3DMESH command at the command line.
2. Enter size of mesh in M and N direction, requiring an integer between 2 and 256.
3. Specify the location for vertices as prompted. The number of vertices equals the M value times the N value. Specifying the last vertex point completes the mesh.
