To Create a Target Point Light From a Point Light

[GstarCAD 2027](#) · [Command Reference](#)

To Create a Target Point Light From a Point Light

1. Select a point light in the drawing area.
2. In the Properties palette, under Geometry tab, click the Targeted property and select Yes from the drop-down list.
3. Modify the Target X, Target Y, and Target Z properties to specify the target for the point light.
