To Enter Commands

[GstarCAD 2027](#) · [Command Reference](#)

To Enter a Command on the Command Line

You can use one of the following methods to enter the command:

- At the command prompt, type the full command name and press Enter or Spacebar.
- If Auto-Append is turned on, start typing the command. Press Enter when the correct command is highlighted in the command text area.
- Enter the command alias (a shorter, alternate name that is stored in the .pgp file) and press Enter.

To Reuse a Recently Used Command

You can use one of the following methods:

- Click within the command line and press the Up or Down Arrow key to cycle through commands you have entered.
- Right-click the command line and select Recent Commands.
- Right-click the drawing area and select a command from the Recent Input list.

To Repeat a Command

You can use one of the following methods:

- With the cursor at the command prompt, press Enter or the Spacebar after the command is complete.
- Enter the MULTIPLE command at the command prompt, it prompts you to enter the command name to repeat.

To Complete a Command Entry

You can use one of the following methods:

- Press Enter.
- Press the Spacebar.
- Right-click and select Enter or just right-click (depending on right-click behavior settings).

To Cancel a Command

Press Esc.
