## To Find and Replace Text in a Drawing

[GstarCAD 2027](#) · [Command Reference](#)

### To Find and Replace Text in a Drawing

1. Click Edit > Find on the main menu.
2. The Find and Replace dialog box is displayed, in which you can type the text that you want to find and press Enter.
3. Type the text that you want to use to replace the found text.
4. Select the area where you want to find the text objects from the Find Where drop-down options. You can use the Select Objects button to temporarily close the dialog box and create or modify the selection set.
5. If necessary, expand the dialog box to set the search and text types options.
6. You can click Find to zoom in to each instance. Click Replace for any instances for which you want to update the text.  
You can also click Replace All to update all instances matching the search criteria.
