To Link OLE Objects in a Drawing

[GstarCAD 2027](#) · [Command Reference](#)

To Link OLE Objects in a Drawing

1. Start the source application and open a document.
2. Select the information you want to link and press CTRL + C to copy it to the Clipboard.
3. Open the drawing.
4. Click Edit > Paste Special on the main menu.
5. The Paste Special dialog box is displayed, click Paste Link. Paste Link pastes the contents of the Clipboard into the current drawing and creates a link to the file in the source application. If you click Paste, the Clipboard contents are embedded instead of linked.
6. Click OK.
7. Specify the insertion point in the drawing area.
