To Move an Object Using a Displacement

[GstarCAD 2027](#) · [Command Reference](#)

To Move an Object Using a Displacement

1. Click Modify > Move on the main menu.
2. Select the object to move.
3. Enter D (Displacement) at the command prompt.
4. Enter the displacement in the form of a Cartesian, polar, cylindrical, or spherical coordinate value. Do not include the @ sign, because a relative coordinate is assumed.
