To Work With Circles

[GstarCAD 2027](#) · [Command Reference](#)

To Draw a Circle by Center and Radius or Diameter

1. Click Draw > Circle > Center, Radius or Center Diameter on the main menu.
2. Specify the center point for the circle.
3. Specify the radius or the diameter of the circle.

To Create a Circle Tangent to Two Objects

1. Click Draw > Circle > Tan, Tan, Radius on the main menu.
2. Specify point on object for first tangent of the circle.
3. Specify point on object for second tangent of the circle.
4. Specify the radius of the circle.
