To Work with Linetypes

[GstarCAD 2027](#) · [Command Reference](#)

To Load a Linetype

1. Click Format > Linetype on the main menu.
2. The Linetype Manager dialog box is displayed, click Load.
3. The Load or Reload Linetypes dialog box is displayed, in which you can choose the linetypes to load or click the File button to open a linetype definition (*.lin) file, and choose the linetypes to load.
4. Click OK.

To Unload a Linetype

1. Click Format > Linetype on the main menu.
2. The Linetype Manager dialog box is displayed, choose the linetype and click Delete.

To Change the Linetype of Selected Objects

1. Select the objects.
2. In the Properties palette, click Linetype and then click the down arrow. From the drop-down list, choose the linetype that you want to assign to the objects.

To Set the Linetype for New Objects

1. Click Home tab > Properties panel > Linetype Control drop-down list in the ribbon.
2. Select a linetype to make it current.

To Set the Linetype Scale for New Objects

1. Click Format > Linetype on the main menu.
2. The Linetype Manager dialog box is displayed, click Show Details button.
3. Enter a new value for Current Object Scale.

To Set the Linetype Scale of Selected Objects

1. Select the objects.
2. In the Properties palette, click Linetype Scale and enter the new value.

To Set the Linetype Scale for All Objects

1. Click Format > Linetype on the main menu.
2. The Linetype Manager dialog box is displayed, click Show Details button.
3. Enter a new value for Global Scale Factor.
