Work with Colors

[GstarCAD 2027](#) · [Command Reference](#)

Colors can be assigned to objects by layer or individually. Colors can help you identify objects visually.

[Set the Current Color](#)

You can set the color of an object explicitly or by layer.

[Change the Color of an Object](#)

If an object's color is bylayer, you can change its color by move it to another layers or change the color of layer. You can also set a new color explicitly whether its color is bylayer or not.
