

CLOSELINE Command — GstarCAD 2026

CLOSELINE Command

[GstarCAD 2026](#) · [Command Reference](#)

Commands > C Command > CLOSELINE

Function Description:

This command is used to check the breakpoints and connect the breakpoints if prompts that the area is not closed when generating fill, calculating area and generating area, The connection is closed according to the selected position and the click order, and all the line segments outside the closed area are deleted at the same time. If there is a breakpoint between the two, close the connection at the breakpoint.

The following table shows the connection closing rules of different line segments:

/	Line	Polyline	2D Polyline	ARC
Line	√	√	√	√
Polyline	√	√	√	×
2D Polyline	√	√	√	×
ARC	√	×	×	×
