LAYOUTMERGE Command

[GstarCAD 2026](#) · [Command Reference](#)

Commands > L Command > LAYOUTMERGE

Function Description:

This command is used to merge specific layouts into a single layout. All layouts or model are available to be picked, and you can specify an existing layout or enter a new name to create a new layout as the destination layout.

Command Access:

Menu: Express > Layout Tools > Merge Layout

Ribbon: Express > Layout > Merge Layout

Toolbar: ET: Layout Tools > Merge Layout

Command: LAYOUTMERGE

Alias: /

Command Prompts: /

Operation steps:

1. Executes the LAYOUTMERGE command, and the "Layout Merge" dialog box is displayed, where you can specify the source layout to be merged.
2. After selecting the source layout, click the "OK" button, and it will prompt "Specify the destination layout".
3. After clicking the "OK" button, the command line will prompt:

Delete unused layouts?
