QSELECT Command

[GstarCAD 2026](#) · [Command Reference](#)

Commands > Q Command > QSELECT

Function Description:

This command is used to create a selection set according to filter conditions. The Quick Select dialog box is displayed. Users can filter by the object type and property. For example, users can select all multiline text objects with a specified text style in a drawing.

Command Access:

Menu: Tools > Quick Select...

Ribbon: Home > Utilities > QSELECT

Toolbar: /

Command: QSELECT

Alias: /

Shortcut: Right-click and click Quick Select in the drawing area when all commands inactive

Command Prompts: /
