SKETCH Command

[GstarCAD 2026](#) · [Command Reference](#)

Commands > S Command > SKETCH

Function Description:

This command is used to create a series of freehand line segments. Users can use this command to create irregular boundaries. Before this, users should specify the object type (line, polyline, or spline), increment, and tolerance firstly.

Command Access:

Icon: /
Menu: /
Ribbon: /
Toolbar: /
Command: SKETCH
Alias: /

Command Prompts:

Record increment <1.0000>:
Sketch. Pen/eXit/Quit/Record/Erase/Connect.

Record increment

Defines the length of each freehand line segment drawn by sketching. To create a line, the moving distance of the pointing device must be greater than the increment value. Users can use the SKETCHINC system variable to specify the increment value.
