SPELL Command

[GstarCAD 2026](#) · [Command Reference](#)

Commands > S Command > SPELL

Function Description:

This command is used to check the spelling in a drawing.

After you enter the SPELL command, the Check Spelling dialog box is displayed. Pressing Start (S) to check

the spelling. If users specify the Entire drawing to check, it firstly checks in model space, and then in paper space on each layout.

Note: It will not check invisible text (such as text on hidden layers and hidden block attributes) and it will also not check blocks with non-uniformly scaled factor or objects with unsupported annotation scale.

Command Access:

Menu: Tools > Spell Check

Ribbon: Annotation > Text > Spell Check

Toolbar: Text > Spell Check

Command: SPELL

Alias: /

Command Prompts: /
