TIME Command

[GstarCAD 2026](#) · [Command Reference](#)

Commands > T Command > TIME

Function Description:

This command is used to display statistical information about the date and time of the current drawing.

Command Access:

Menu: Tools > Inquiry > Time

Ribbon: Home > Utilities > Measure > Time

Toolbar: /

Command: TIME

Alias: /

Command Prompts: /

Current time

Displays the current date and time in 24-hour time system accurately to millisecond.

Created

Displays the date and time of the current drawing when created.

Last updated

Displays the last updated date and time of the current drawing. The creation time is the first time of "Last updated". It is modified after saving each time.

Total editing time

Displays the total time used for editing the current drawing. This timer is updated by the application, users can not stop or reset it. The total editing time does not include plotting time. If exiting without saving the drawing, the total editing time is not aggregate.

Elapsed timer (On)

The elapsed timer runs when executing programs. It can be turned on or turned off or reset.

Next automatic save in

Specifies the date and time for next saving automatically. Users can set the time interval by the OPTIONS and SAVETIME system variable.

Display

Displays the updated time repeatedly.

ON

Turns on the closed elapsed timer.

OFF

Turns off the elapsed timer.

Reset

Resets the elapsed timer to be 0 day 00:00:00.000.
