## DIMEXO System Variable

[GstarCAD 2026](#) · [Command Reference](#)

### Function Description:

The DIMEXO system variable is used to specify the distance that the extension line offsets origin.

|               |                                     |
|---------------|-------------------------------------|
| Type          | Real                                |
| Saved in      | Drawing                             |
| Initial value | 0.0625(Imperial) or 0.6250 (Metric) |

The DIMEXO system variable value determines the minimum offset for constant length of extension lines.
